

ECO-14™

from PRC:

*Powerful capabilities
for adult users!*

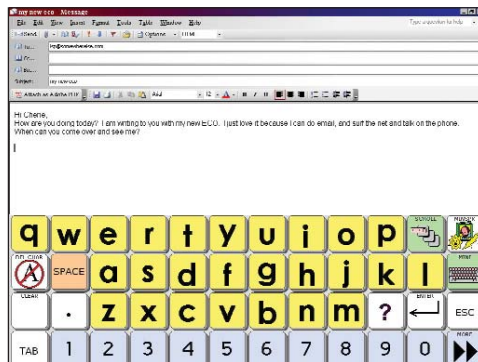

Large, 14.1" XGA TFT display for easy access!

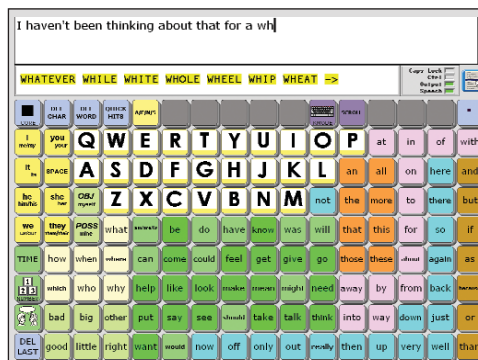

The ECO-14 display screen is a full 35% larger than most, making access easier for those with vision or motor challenges. The device also allows a full range of **additional access options**, including single, dual-switch, joystick and wheelchair joystick scanning, customizable scanning routines, and integrated eye tracking through the Madentec Tracker™ Inside option.

Expanded vocabulary tools for robust communication!

ECO-14 comes pre-programmed with ALL versions of WordCore™, the word-based vocabulary program designed for literate adults with ALS that features 45, 84, and 144 location formats. Additional time-saving word prediction capabilities are available through the WordQ™ software from Bloorview MacMillan Centre, which provides expanded word and next-word prediction.

ECO-14 combines speech and computing capabilities in one user-friendly device.

Powerful word prediction systems like WordCore allow faster communication.

Complete Windows® XP software compatibility!

In a single device, users can now communicate and surf the Internet, send and receive emails, and run common software programs. The large, high-resolution screen offers users **more display space** for viewing web sites, reading and editing Word documents, and working with other software applications. Either Unity® or WordCore can be used as the onscreen keyboard.

More ECO-14 features:

- Built-in DVD/CD drive for adding new software and importing music and digital images.
- Integrated phone access via the AirCard® phone option.
- Integrated infrared controls and pre-programmed commands for aids to daily living.
- Special vocabulary pages for common medical situations.
- Synthesized and digitized speech options.
- And more!
