

New Bilingual Language Systems from PRC

Two new Spanish-English language systems bring the power of motor planning to bilingual communicators

call **800 262 1984**
or visit **www.prentrom.com**

PRC is pleased to offer two new language systems designed specifically for those building communication skills in a bilingual environment. Bilingual Spanish-English speakers and monolingual Spanish speakers learning English will gain the most from these research-based programs.

UNIDAD® is based on the innovative Unity® language system and delivers the power and flexibility of Unity with a system that enables identical motor plans for vocabulary in both Spanish and English (36, 60 and 84 locations available).

LAMP Words for Life® – Spanish/English builds on the LAMP™ methodology of one consistent and unique motor plan for each word in the Lamp Words for Life language system designed specifically for clients with autism. The popular LAMP Words for Life English system is mirrored by Spanish vocabulary in single hit and sequenced configurations.

In both systems, the communicator can quickly toggle between words in Spanish and English while maintaining a consistent motor plan, accelerating learning in both languages. In addition, two Acapela voices – Emilio and Valeria – produce correct pronunciations in English and Spanish.

Powerful language systems plus the support you expect from PRC

- Quick Reference Guides in English and Spanish
- Spanish language implementation supports in the AAC Language Lab®
- Implementation support from your PRC team of AAC specialists
- Parents' guides to AAC available in Spanish and English from the PRC website

UNIDAD and LAMP Words for Life - Spanish/English can be selected as the primary configuration for your device. Or, they may be added as an additional language system for \$395.

Accent® 800 with LAMP Words for Life.

UNIDAD Language System

As a professional or family member working with someone using UNIDAD, you'll love:

- Three key sizes (36, 60 and 84) to meet a variety of access and language needs
- English and Spanish versions that mirror each other for ease of understanding and implementation
- Intuitive placeholders for individualized vocabulary ("My Categories")
- Activity sets in English that help teach words in a specific activity
- Pages for remote controls and computer access

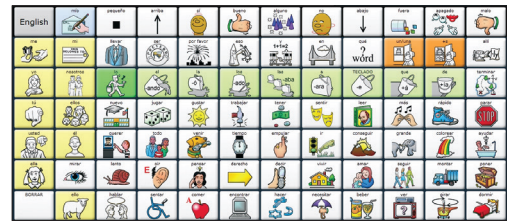

UNIDAD Spanish above and English below.

LAMP Words for Life – Spanish/English

As a professional or family member working with someone using LAMP Words for Life – Spanish/English, you'll love:

- The familiarity of the LAMP Words for Life language system
- The ability to toggle to Spanish while keeping motor plans for a word as similar as possible to English
- The ability to use both Spanish and English words in a single utterance
- Smooth transition from 1-hit to Full

LAMP Words for Life Spanish above and English below.

The PRC Advantage

Both UNIDAD and LAMP Words for Life – Spanish/English include features unique to PRC:

- Language systems grounded in research about the structure of language and language learning
- WordFinder – tells you where a word is located
- Built-in data logging – helps measure and maximize use
- Vocabulary Builder – an innovative feature that temporarily limits the amount of vocabulary appearing on the display
