

Unity 84 Sequenced Core Word Activity of the Month.

Puzzles are a fun way to teach core words with a speech generating device. As the communication partner, whether you are a family member, teacher/therapist or friend, you can use these words as you talk to model where they are located and how powerful they can be. By using a variety of words to comment, describe, question, direct and request, we teach language in a natural context. Challenge yourself to see how many phrases you can make from these target words. Try using these words to model language as you play with puzzles this week!
